Dear Dr. Chow,

It's disappointing that the paper skipped the Australian Model which is most suitable for Hong Kong. The Model is suitable for Hong Kong because uses medical tax and voluntary medical insurance in that progressive tax is a fair re-distribution of income and voluntary medical insurance makes choices possible. They are the core values of Hong Kong People.

For details of the Australian Model, please ask Mr. Solomon, an Australian, who is the CE of HA and see "醫療多國度 - 公私互補 - 澳洲" produced by RTHK.
