Dear government,

RE: 醫療改革諮詢文件--- hk girl 's comment on 080317 at 13:54  
i strongly dis-agree your proposal.

1. i have my own medical care insurance.
2. i have financial problem..
  1. i earn HK10000, pay rental HK\$2000, to parents HK\$4000, transportation HK\$2000, and eat and whatever, HK\$2000..
  2. but, i still want to work hard like our chief executive donald.. i hope one day will be a better day for me.. then, i can benefit to the society more..
  3. what if
3. if the government still benefit the people and all their families who come to HK just for welfare... then government more burden
4. if the government keeps on satisfy these POOR people and not educate them.. our society will hide a big bomb...
5. i understand the doctor and workers or medical expenses are high...
  1. restrict these people/mainland people taking advantage from HK..
  2. keep the people who pay tax and make them have more confident to HK..

ok.. i need to work now for my future and i really hope HK government can listen and to respect more people like me even we earn less but we respect government... i really think if people just want things from government .. they are NOT respect to you and you should not give them so many things..

i love you Hk..  
from a hard working HK girl

thanks for listening and i can be reached at \_\_\_\_\_
